Operation and Maintenance Manual16 PagesFile Type: PDFFile Name: ohmeda_biliblanket_meter_2_operation-maintenance_ma.pdf Part Number: ILT750-BIL1454Price Per Unit: \$1,643.00 Don't get left in the dark! International Light Technologies has an off the shelf replacement for people using any of the GE phototherapy blue light systems, or looking to replace their discontinued Ohmeda blue light meter. Features Reads within a few % of the discontinued Ohmeda meter Large, easy to read OLED display Calibration at 454 nm using a GE LED light source Verify irradiance and average irradiance values over the entire treatment area in less than 1 minute ISO17025 Accredited and NIST Traceable calibration Class 1 Medical Device Select units ($\mu\text{W}/\text{cm}^2/\text{nm}$ or W/cm^2) Easy-to-hold and clean, light weight ergonomic design Custom filter matching designed Made in the USA < Back to All Light Meters, Lux Meters & Radiometers Description Specifications Documents & Downloads The ILT750-BIL1454 is a direct replacement to the Ohmeda light meter for testing GE traditional and LED blue light sources used for treatment of infant jaundice. The advanced features of the ILT model eliminates the need to touch a pen and paper or do any math. Simply scan the detector over the blanket or under the light source and let the meter do the math for you. Through extensive design and testing the ILT750-BIL1454 meter is able to read within a few percent of the discontinued Ohmeda Biliblanket II Blue light meter. The meter can be used not only on the blanket but on all of the GE lighting systems including: GE Giraffe Systems GE Lullaby Systems GE BiliSoft Systems Traditional GE Blue light systems OEM's and Distributors are welcome. Custom branding available and includes: • Custom artwork on all labels • Startup / splash screen display • Software / firmware - including company name, part number calibration information and more. Watch our video showing the simplicity of the ILT750-BIL1 vs Ohmeda Biliblanket II ILT750-BIL1454 Device Specifications Meter Current range: 1 nA to 1.65 uA Optical Sensor 410 - 510 nm 454 nm peak Measurement Features: Band Irradiance Range .8 to 7000 $\mu\text{W}/\text{cm}^2/\text{nm}$ Irradiance Range 30 to 20,000 $\mu\text{W}/\text{cm}^2$ Visualization Intensity over time, Plus Peak Stats Min, Max, and Average Screen Update .5 seconds Units $\mu\text{W}/\text{cm}^2/\text{nm}$ and W/cm^2 Power Supply 2 AA batteries Mechanical Dimensions (in mm): Meter 160 x 70 x 35 (HxWxD) Meter Display 50 x 32 (WxH) Sensor 65 x 43 x 32 (includes 5mm room for wire to bend) (HxWxD) Meter & Sensor Mounted 205 x 70 x 35 (HxWxD) Cable 860 mm (2.8 ft) Weight 220g (0.5 lb) Mounting Sensor attaches to top of meter face up or down. Can also be used detached. Ambient Temperature 0-40 Deg C Cosine Correction Yes Linearity Validation Yes Shipping Weights & Dimensions Shipping Box 15" x 12" Shipping Weight 3 lbs Check out our wide array of other Light Measurement Systems Purchase Orders Request a Quote Help
